PROFILE

Software Developer with **4+ years of experience** building **scalable, API-driven web applications** using **PHP, Django, Laravel, CodeIgniter, and React**. Strong experience in **REST APIs, database design, system integration, and enterprise applications** across industrial, ERP, and financial domains. Proven ability to **lead small teams, improve performance**, and deliver production-ready systems.

EXPERIENCE

ComSys IT Services — *Software Developer* **2023 -Present (3 years)**

Job Responsibilities:

- Developed and deployed **10+ production-grade web applications** using Django, Laravel, and CodeIgniter.
- Designed and integrated **RESTful APIs** handling **10,000+ daily transactions** using MySQL and SQL Server.
- Led a team of **4 developers**, improving sprint delivery time by **25%** through code reviews and task planning.
- Manage **project workflows**, timelines, and code reviews to ensure on-time and quality delivery.
- Architected scalable system designs and enforced **secure coding standards**, reducing production issues by **30%**.
- Integrated third-party systems including **biometric devices, industrial machines, and external APIs**.
- Conducted **technical mentoring** sessions, onboarding **3 junior developers**.
- Coordinated with clients for requirements, feasibility analysis, and technical documentation.

Brightcode Software Services Pvt. Ltd. — *PHP Web Developer*—**2022-2023 (1 year)**

Job Responsibilities:

- Develop, test, and deploy web applications using frameworks such as **Django, CodeIgniter, and Laravel**.
- Design and integrate **RESTful APIs** with **MySQL or SQL Server** databases.
- Write clean, efficient, and maintainable code following coding standards and best practices.
- Developed **5+ web applications** using **Core PHP and CodeIgniter**.
- Perform **bug fixing**, debugging, and optimization for performance improvement.
- Managed source control with **Git** and handled staging/production deployments.

Orbique Software Pvt. Ltd. — *Junior Web Developer*—**2022–4months**

Job Responsibilities:

- Built responsive static and dynamic websites using **HTML, CSS, JavaScript, Bootstrap**.
- Fixed UI bugs and optimized layouts for cross-browser compatibility.
- Designed marketing creatives and posters using **Canva**.

Skills

- **Backend Keywords**

Django, Laravel, CodeIgniter, Core PHP, REST API, MVC, OOP, Authentication, LangChain, LangGraph

- **Full Stack Keywords**

Full Stack Developer, API Integration, Frontend and Backend, Scalable Applications, System Design

- **Database Keywords**

MySQL, SQL Server, Database Design, Query Optimization

- **Product Company Keywords**

Production Systems, Performance Optimization, Code Reviews, Scalability, Security Best Practices

EDUCATION

- B.Tech–
Computer Science and Engineering, University of R.G.P.V, from Radharaman Institute of Technology & Science Bhopal (M.P) – 2016 - 2020 – 8.06 CGPA
- 12th–CBSE, P.C Patsa Senior Secondary School, Samastipur, Bihar – 2015 – 61.2%
- 10th–CBSE, P.C Patsa Senior Secondary School, Samastipur, Bihar – 2013 – 83.6%

Notable Achievements:

- Led a team of 4 developers to improve sprint delivery time by 25% through optimized task planning and code reviews.
- Architected scalable system designs that reduced production issues by 30% through the enforcement of secure coding standards.
- Automated BPO reporting processes resulting in a 40% reduction in manual effort.
- Engineered a high-volume API infrastructure handling 10000+ daily transactions.

Major Projects:

- **Material Inventory Management System (Django) :**
 - A robust, web-based inventory solution developed using the Django framework to streamline warehouse operations, track material lifecycles, and maintain accurate stock levels in real-time.
 - Master Data Management: Centralized control panel to manage items, suppliers, categories, and warehouse locations.
 - Material Receipt (Inward) Generation: Efficient logging of incoming stock with automated, professional receipt generation upon delivery.

- Material Outward (Dispatch): Seamless tracking and authorization of materials leaving the inventory for production or distribution. [\(Project Link\)](#)
- **Transforming Talent Acquisition-Automated LinkedIn Scraper & Resume Builder (Django):**
 - automation tools that turn hours of manual sourcing into a 1-click process. I can deploy a custom LinkedIn Candidate Scraper & Automated Resume Generator tailored exactly to your agency's workflow.
 - Scraping Engine: Apify API (Built-in anti-bot bypass and proxy rotation to ensure safe, continuous data extraction).
 - Frontend Dashboard: A clean, easy-to-use candidate list viewer where your team can filter, view, and export data.
 - Document Automation: Automated resume generation using HTML-to-PDF engines for beautiful, branded layouts. [\(Project Link\)](#)
- **Smart LeadGen & Marketing Automation Tool:**
 - This Marketing Automation Tool streamlines lead generation by scraping business data from Google and organizing it for easy use.
 - It enables bulk outreach using customizable WhatsApp and email templates, with automation powered by Python and Playwright for human-like interaction.
 - The system verifies valid contacts, skips invalid ones, and maintains session login for continuous operation.
 - It also supports bulk email campaigns with tracking to prevent duplicate messaging and improve efficiency. [\(Project Link\)](#)
- **Head Count Monitoring System – Indian Oil**
 - Real-time workforce monitoring system across hazardous and non-hazardous zones.
 - Integrated **.NET APIs with Django**, processing biometric punch-in data.
 - Displayed live dashboards on **multiple industrial screens**, improving safety compliance. [\(Project Link\)](#)
- **ERP Management System – ComSys IT**
 - Built a company-wide ERP using **CodeIgniter**.
 - Automated **BPO calling via Excel uploads**, attendance, leave management, and task tracking.
 - Reduced manual reporting effort by **40%**.
- **SafePass System – Indian Oil**
 - Developed entry-pass management for **drivers, laborers, and transporters**.
 - Implemented **photo capture, Aadhaar-based uniqueness, blacklist logic**, and renewal workflows.
 - Tech stack: **Laravel, MySQL, Bootstrap 4**.
- **Loan Advisory System – ILO**
 - Built frontend in **React** with backend APIs in **Django**.
 - Implemented loan tracking, multi-level reporting, and advanced filters.
 - Enabled faster loan status tracking across banks and products.
- **AI Chatbot Integration**
 - Built a Django-based chatbot using **LangChain** and **LLM APIs**.
 - Automated responses for internal application workflows.
- **OTT Based Application(Netflix)**
 - Laravel-Based OTT Platform (Netflix-Style) project
 - Social media sign in authentication.
 - Live Tv show in this platform
 - Project source code: https://drive.google.com/file/d/1FZC37qiQMpc2FQGClkvGrqi_-PXp9V8j/view
- **Financial Loan Management System**
 - Customer onboarding, document upload, admin verification, and loan approval workflow.
- **Online Book Exhibition Platform**
 - Admin-managed product listings and customer orders.
- **Exam Test & Wallet System**
 - Online test series with wallet rewards and executive dashboards.
- **International Music Class Booking App**
 - Time-zone-aware scheduling system for students and teachers worldwide.
 - REST API-based architecture using CodeIgniter.

- **E-Commerce Web Application**

- Shopping cart, admin management, and order processing system.
